## **Transforming Gynecologic Health**

Aspira Women's Health Inc. is dedicated to the discovery, development, and commercialization of noninvasive, AI-powered tests to aid in the diagnosis of gynecologic diseases. Current products include OvaWatch® and Ova1Plus® which are offered to clinicians as OvaSuite<sup>SM</sup>. Together, they provide the only comprehensive portfolio of blood tests to aid in the detection of ovarian cancer for the 1.2+ million American women diagnosed with an adnexal mass each year.

Our in-development test pipeline is designed to expand our ovarian cancer portfolio and addresses the tremendous need for noninvasive diagnostics for endometriosis, a debilitating disease that impacts millions of women worldwide. In ovarian cancer, our OvaMDx<sup>SM</sup> risk assessment is designed to combine microRNA and protein biomarkers with patient data to further enhance the sensitivity and specificity of our current tests. In endometriosis, EndoCheck<sup>SM</sup> is the first-ever noninvasive test designed to identify endometriomas, one of the most commonly occurring forms of endometriosis. The EndoMDx<sup>SM</sup> test is designed to combine microRNA and protein biomarkers with patient data to identify all endometriosis.

### **Investment Highlights**

- Revenue-generating company with a portfolio of proprietary risk assessment assays targeting ovarian cancer, collectively called OvaSuite
- Experienced management team with proven track record of success
- Broad managed care coverage (Ova1Plus and OvaWatch Medicare reimbursement - \$897)
- Strong IP and technology protection
- Transformative in-development test pipeline including EndoCheck, EndoMDx, and OvaMDx

#### Our OvaSuite Products

OvaWatch, a lab-developed test performed on an FDA approved platform with a 99% Negative Predictive Value, assists in the initial clinical assessment and ongoing monitoring of ovarian malignancy risk in patients with adnexal masses not planned for surgical intervention.

Ova1Plus is a reflex process of two FDA-cleared blood tests, Ova1®, and Overa®, to assess risk of ovarian malignancy in women with adnexal masses planned for surgery.
